

*Drinking Water You Can Trust*

## **Pumping System Agreement**

---

Account Number

---

Date:

I/We understand and agree to abide by the rules, regulations and By-Laws of Umpqua Basin Water Association, Inc. In particular, I/We shall provide, with any booster pump or pumping system installation on my/our water service line, a low pressure cut-off switch on the inlet side of the pump. I/We also agree to hold Umpqua Basin Water Association, Inc., harmless of any liability pertaining to issues or damage to my/our pumping system along with any water quality issues beyond the point of entrance of my/our pumping system or gravity feed water containment vessel.

Umpqua Basin Water Association, Inc. does not warrant or imply that the water pressure will be constant or uninterrupted. It is acknowledged that for reasons both within and beyond the control of Umpqua Basin Water Association, Inc., the pressure will vary from time to time and it is for these reasons that the low pressure cut-off switch will be installed. It is recommended that the low pressure cut-off switch be set at 2-3 lbs.

It is further understood and agreed to that I may not draw more than five (5) gallons per minute from the prime water system with any booster pump installed on my water service.
